English

complete. This game is really bad. You get shot through walls, really bad accuracy and hit detection. Watch for some gameplay:

<https://youtu.be/IpFrE5R4kg0>. Retro Miami, despite its derivative presentation, is an indie title that could have turned out as a decent game if not for poor game design decisions...

PROS

- + The underworld vibe (color, music, setting)
- + Recruiting companions
- + Low price tag

CONS

- FPSCreator (GameGuru ancestor)
- Weapons have poor accuracy
- Bullet sponge enemies
- Terrible companions AI
- Some framerates drops during firefight
- Low production value (glitchy animations, blood effects, audio, etc.)

Not the worst game on Steam, but far from being an average one...

Rating:

2.5 / 10. Just like dark souls. Tries to invoke "Hotline Miami", fails. Terrible shooting mechanics, awful music and sound, ugly textures and assets. This thing is a grab bag of terrible choices frankensteined together.

<https://youtu.be/V8UqmpHb6vcQ>. God awful controls, broken gameplay, and it's FULL of stolen assets.

Don't give these guys your money, even IF you have a coupon.
